Wood Solutions**

Us.

a story shaped by wood

The story started with a simple but rare curiosity.
The hidden textures inside raw wood, waiting to be revealed.

Located in the **Aegean region**, our relationship with wood naturally evolved around olive trees — a precious material with exceptional richness and character.

Over time, this curiosity grew into a production culture.

Today, STEVDE works with a wide range of **wood species**, with **highly skilled craftsman** and **advanced machinery** capable of creating both unique pieces and consistent large-scale productions.

The brand is now led by the second generation — **an architect** and **an industrial designer**, bringing contemporary design thinking, technical precision, and hospitality-focused solutions into every project.

Each piece carries the memory of the material.
